

Photomultiplier Tube

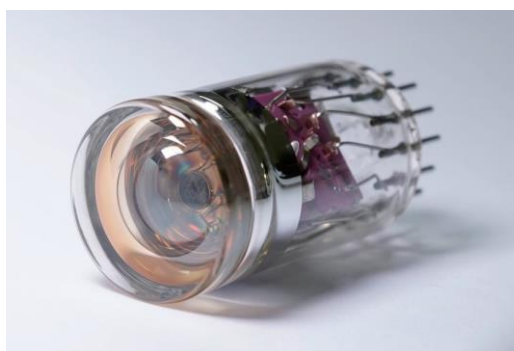

Model: OPR-PMT2014-A

Features

- Fast Response
- Compact Structure

Applications

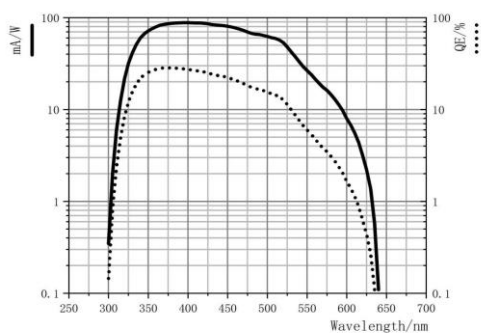

- Medical Measurement
- Radiation Measurement

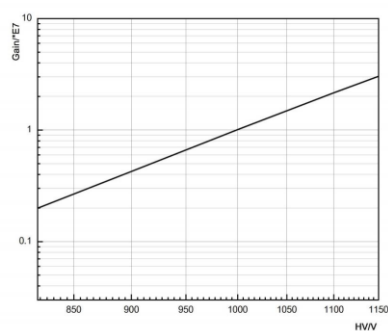

Technical Specification

Window material		Borosilicate glass			
Photocathode material		Bialkali			
Dynode structure		Circular and Linear focused			
Cathode parameters		Min.	Typ.	Max.	Unit.
	Cathode effective diameter	22			mm
	Spectral response range	290-650			nm
	Quantum efficiency peak wavelength		380		nm
Anode parameters	Blue sensitivity	10			μA/lmf
	Anode sensitivity	400			A/lm
	Dark count			100	Hz
Time response	Anode dark current			3	nA
	Rise time		1.5		ns
Time response	TTS		1.5		ns
Operating ambient temperature		-30~+50			°C
Storage temperature		-50~+50			°C
